MMR / DEALER CHECKLIST

Bass Strings: Measure Before You Match

Scale labels, winding length, and construction all belong in the fitting conversation.

Instrument

Exact model / nominal scale / bridge loading / anchor type / tuning / four, five, or other string count.

Measure

Record the string maker's specified reference points and the instrument measurement using those same points.

Inspect fit

Saddle contact / nut contact / taper or silk locations / tuner requirements / fifth-string requirements.

Select

Product code / all gauges / construction / published length specification / compatibility confirmed by whom or what document.

Handoff

Installation and setup notes / packet label / unresolved issue referred before cutting or fitting.
